Free, Prior and Informed Consent and Sustainable Forest Management in the Congo Basin

A Feasibility Study conducted in the Democratic Republic of Congo, Republic of Congo and Gabon regarding the Operationalisation of FSC Principles 2 and 3 in the Congo Basin
# TABLE OF CONTENTS

## INTRODUCTION
What is FPIC and why is it important? ................................................. 1
The Congo Basin and FPIC .................................................. 2
The objectives of this report ....................................................... 3

## FOREST POPULATIONS IN THE CONGO BASIN
How to define who are indigenous people in Central Africa? .................. 7
Legal recognition of the status of ‘Pygmies’ as indigenous people .......... 7
The rights of indigenous people .................................................. 8

## COUNTRY PROFILES
Country Profile: Republic of Congo ............................................ 10
Country Profile: Democratic Republic of Congo ............................. 12
Country Profile: Gabon ...................................................... 13

## METHODOLOGY
FPIC and FSC Principle 2 ................................................................ 17
FPIC and FSC Principle 3 ................................................................ 18

## APPLYING FPIC IN PRACTICE
ISSUE 1 – Consent ........................................................................ 21
1. Different models of consent ..................................................... 22
2. Strategies for reconciling European and Congo Basin models of consent ........... 23

## ISSUES
ISSUE 2 – Institutional capacity building ........................................ 25
1. Skills of the head of the social team ......................................... 25
2. The size of the social team ..................................................... 26
3. The composition of the social team .......................................... 26
4. Expertise of communicators .................................................... 26
5. Equipment and materials ......................................................... 27
6. Coordination between teams within the company .................. 27
7. Effective structures to ensure regular information exchange .......... 27

## ISSUES
ISSUE 3 – Information and communication .................................. 30
1. Informing, social structure and marginality ............................... 30
2. Appropriate means and media for informing populations with low levels of formal education and literacy ........... 31

RECOMMENDATIONS ........................................................................ 24
RECOMMENDATIONS ........................................................................ 24
RECOMMENDATIONS ........................................................................ 24
RECOMMENDATIONS ........................................................................ 24
3. Selection of information ......................................................... 32
4. Verification of the information process and communication efficacy .......................... 33
RECOMMENDATIONS .................................................................. 34

ISSUE 4 – Participation and negotiation ........................................... 36
1. Active input from both parties ...................................................... 36
2. The discussion and negotiation of sensitive subjects ......................... 37
2.1 The communities’ right to refuse industrial forestry operations .......... 37
2.2 The sharing of benefits from industrial forestry operations ............... 38
2.3 The awareness of negative impacts from industrial forestry operations .... 40
RECOMMENDATIONS .................................................................. 41

ISSUE 5 – Resource access and livelihoods ....................................... 43
1. GPS mapping of key economic and cultural resources ....................... 43
2. Mapping of usage zones ................................................................ 45
3. The importance of involving local people in the management
   of possible negative impacts of industrial forestry on resource use ........ 46
RECOMMENDATIONS .................................................................. 47

ISSUE 6 – Forest management partnerships ...................................... 48
1. The role of forest management partnerships in FPIC .......................... 48
2. Partnerships and forest people ..................................................... 48
3. The need for accountability and responsibility in investigating
   and resolving problems ................................................................. 49
4. Dispute resolution procedures ..................................................... 50
4.1 Complaint procedure .................................................................. 50
4.2 Major conflicts .......................................................................... 50
RECOMMENDATIONS .................................................................. 51

ISSUE 7 – Transparency .................................................................. 52
1. Transparency in relation to local forest people .................................... 52
2. Transparency at the national level and beyond .................................... 52
3. Transparency at the international level ............................................. 53
RECOMMENDATIONS .................................................................. 53

CONCLUSION ............................................................................... 55
The twelve-step FPIC process .......................................................... 56
RECOMMENDATIONS TO SUPPORT THE INTEGRATION OF FPIC INTO THE LEGAL, COMMERCIAL AND SOCIAL CONTEXT OF FOREST MANAGEMENT IN THE CONGO BASIN

1. Integrating FPIC into national laws in the Congo Basin ........................................58
2. Elaborating and testing of procedures for FPIC in the Congo Basin ......................59
3. Developing competence within forestry companies able to implement FPIC in Congo Basin concessions ........................................59
4. Empowering local populations to negotiate FPIC .................................................60
5. Dissemination of the FPIC principles and process ..............................................60
