

Foreign explorers proudly presenting their trophies.

"Hunting adventures in Kamtschatka 8 days from US \$ 7750.-, at the Baikal Lake in Siberia from US\$ 4750.- (prices include trophy)"

Hunting magazines in the US and Europe widely advertise hunting trips to these and other regions in Russia. Their targets are bear, elk, ibex, ram, various species of sheep and deer.

**Statement from Sergej Longinov
member of the National Commission
of the "Council of Rebirth of the
Itelmen in the Kamtschatka".**

The promotion of commercial adventure hunting trips to our land has shocked our indigenous peoples. The animals which rich western people hunt in our region have served our peoples for centuries as a source of food, for the production of clothing. And not least do these animals represent a spiritual and religious value to our peoples.

As a member of the commission of the "Council of the Rebirth of the Itelmen in the Kamtschatka" I strongly oppose the further promotion of commercial hunting adventures in the lands of my ancestors.

Historically these territories belong to our ancestors. At present our National Commission and representatives of the Russian Federation negotiate the restitution of the land to the Itelmen and also the restoration of a national economic system. Our traditional economy of course includes the use of our natural resources.

Unfortunately at present the Russian authorities are in charge of affairs in the traditional territories of the Itelmen. The Russian Ministries exploit resources like gold, diamonds, natural gas. They allow overextensive hunting and overfishing.

The Ministry of Hunting of the RSFSR receives large sums of hard currencies for contracts that entitle American and European travel agencies to fish and hunt in our territories. Not a single Rubel, Dollar or Mark goes to the Itelmen themselves.

The state politics on these "colonial territories" leads to confrontations between the Russian government and the indigenous peoples of the half-island of Kamtschatka.

I therefore call upon the international community to stop the commercial overexploitation of the resources of the Itelmen. The same demand has been presented to the Ministry of Hunting, the Northern State Committee and the Council of Ministers of the RSFSR.

1993 is the International Year of Indigenous Peoples. With the support of European and international organizations we struggle for our rights. Therefore foreign hunting parties should no longer interfere with the political and economical relations between Russia and the indigenous peoples of the Kamtschatka.
